Mr. C. E. Haglund
Executive Officer

Dear Sir:

With reference to your letter of December 6, we are enclosing two of our 1941 MIRRO and VIKO catalogs and one copy of our 1947 MIRRO catalog. Duplicate

We are not manufacturing all the items that are listed in these catalogs, but do use them as references as we add new items to our MIRRO line.

We hope these catalogs will help you in your research work in the Scientific Library.

Yours truly

ALUMINUM COOKING UTENSILS

The Choice of Experience

RETURN TO
DESIGN DIV.

LIBRARY
DEC 14 1948
U.S. PATENT OFFICE

EASY TO CLEAN

In a recent Good Housekeeping survey, the fact that Aluminum is "Easier to Clean" rated first among women's reasons for preferring Aluminum.

LIGHT — BUT STRONG

Easier to handle; yet quality Aluminum Utensils are so strong and durable that they last indefintely.

SUPERIOR HEAT-CONDUCTIVITY

Aluminum conducts heat approximately three times faster than other commonly used materials. This rapid conductivity spreads heat quickly, more evenly throughout an entire utensil, avoiding hot spots. For instance, a pint of milk can be boiled down to one-quarter pint, over low heat, without stirring — and it won't scorch. In baking and roasting utensils this rapid spreading of heat results in evener browning. Because of Aluminum's low emissivity and superior conductivity, less heat is required.

ALUMINUM IS "FRIENDLY TO FOOD"

Aluminum cannot possibly change the natural color, flavor or wholesomeness of foods. And as for foods containing vitamin C (as milk), Aluminum is absolutely without effect on healthful vitamin potency.

GOOD HOUSEKEEPING SAYS: "Good Housekeeping has investigated thoroughly the matter of absorption of Aluminum from cooking utensils, both as to extent and to possibility of toxic amounts, and we believe there is absolutely no danger from the use of such ware. Aluminum cooking utensils have been pronounced harmless by the Hygienic Laboratory of the United States Public Health Service, and other organizations devoted to the public good.

PLUS ADVANTAGES OF MIRRO

1. Pioneers in creating new utensils and improving old.
2. Always the latest features in cooking utensils.
3. Spot welded handles on many items.
4. Variety of finishes such as Alumilite, Sand Blast, Lacquer, Chrome, etc.
5. With rolling mills we control quality of our sheet.
6. Complete lines of cooking utensils, giftware, gadgets and toy sets.
7. Complete advertising cooperation:
   - National magazine advertising
   - Country-wide newspaper advertising
   - Trade journal advertising
   - Store and window display material
   - Mailing circulars
   - Suggested advertising layouts
   - Catalog pages and listings
   - Trained advertising experts
8. Merchandising services such as:
   - Seasonal campaigns
   - Coupon specials
   - Demonstration allowances on specialties
9. World's largest manufacturers of aluminum cooking utensils.

STAR FEATURES OF MIRRO WARE

Introducing the new large easy grip Mirro knob

MIRRO features such as knobs, beads, spouts, and trimmings make a great deal of difference in the work of the housewife who has to cook "three squares per day." These MIRRO Star Features are important things women look for when buying aluminum ware:

1 MIRRO is again first with a new, large, easy-grip knob. Designed for beauty and convenience. Made of plastic to meet the particular needs of each utensil, this "plus" feature adds a note of extra quality women will quickly set as a standard.

2 Seamless: A smooth, unbroken line between the exclusive MIRRO Sani-Tite Rim and the side of the pan. A wipe and it's clean. No place here for dirt and grease to collect.

3 Modern extra heavy dome covers give added space to the utensil when cooking bulky foods. Special recessed shoulders allow cover to rest snugly within utensil which helps prevent food boiling over. Seamless, one piece construction make MIRRO covers easy to clean.

4 The utmost utility is built into MIRRO utensils. Accurate, self-measuring graduations save time and steps and eliminate guesswork — another example of MIRRO conveniences.

5 All MIRRO Cooking Utensils are Sun-ray finished inside — beautiful and very easy to clean. The brilliantly polished outside surfaces blend to give MIRRO eye appeal. Handles are positioned to give perfect balance.

6 MIRRO Tea Kettles are conveniently filled through sanitary welded spouts. No crevices or seams to catch dirt. The Tea Kettle is in reality one complete piece.

7 Smoothly rounded corners for convenient stirring and easy cleaning. MIRRO is made of thick, especially hardened aluminum that will give years of excellent and economic service.

Each one wrapped. Trade-marked and labeled.

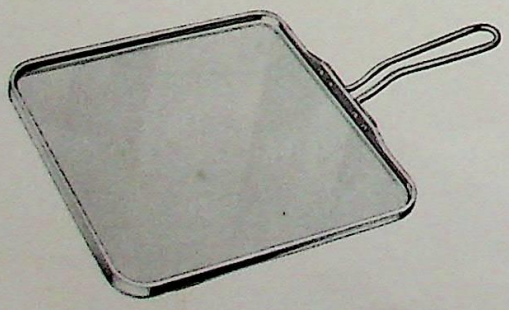
Graduated French Fryer

French or deep fat frying done conveniently and economically. Windsor shape and fine mesh basket of special construction (patented) allow smaller amounts to be prepared, using minimum amount of fat. Basket can be used separately for washing vegetables, berries, etc.; pan for general utility cooking. Large, Sani-Round corners, very easy to clean. Sani-Tite rim, seamless and smooth, no dirt catching crevices. Convenient, accurate graduations. Strong, Sani-Tite handle attached by sturdy rivets.

Polished; inside sun-ray; satin finish, flat, quick-heat bottom. Basket of fine mesh steel wire heavily tinned to resist rusting.

Number	Gauge	Cap. Qts.	Diam. Bot.	Case Lot Dz.	Ship. Wt. Lbs. Doz.
343-M	18	3	6⅝	1	18½

Each one wrapped. Trade-marked and labeled.



Square Griddle-Grill

Perfected greaseless and smokeless griddle. MASSIVELY THICK, EXTRA HARD. Heats evenly. Specially designed for modern electric and gas ranges. Excellent for pan broiling steaks or crisping bacon. Bakes four griddle cakes or grills two medium size steaks at a time. Browns foods beautifully. Practical upturned edge adds strength.

Bright natural finish; satin finish, flat, quick-heat bottom. Strong, rust-proofed steel handle.
